## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 101***

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

1. Claims 1 and 10 are rejected under 35 U.S.C. 101, because claims 1 and 10 claim both a machine and a process, and thus, are directed to non-statutory subject matter. Specifically, claim 1 and 10 are directed into both a "telecommunication network"(machine) and a "method of routing data" (process) , which belong to two different statutory classes.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1 and 10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 is vague and indefinite. Claim 1 first recites: "the telecommunications network comprising: ..." [c1] line 4, and then claim 1 recites: "the method comprising: ..." [c1] second page line 7. Thus, a single claim claiming both an apparatus and the method steps of using the apparatus is indefinite. In *Ex parte Lyell*, 17 USPQ2d 1548 (Bd. Pat. App. & Inter. 1990), a claim directed to an apparatus of a host adapter and the method steps of controlling the detection of a final packet for generating a complete queue process was held to be ambiguous.

Claim 10 is rejected for the same reason set in forth for claim 1. Claim 10 first recites: "the telecommunications network comprising: ..." [c10] line 3, and then claim 10 recites: "the method comprising: ..." [c10] second page line 14. Thus, a single claim claiming both an apparatus and the method steps of using the apparatus is indefinite. In *Ex parte Lyell*, 17 USPQ2d 1548 (Bd. Pat. App. & Inter. 1990), a claim directed to an apparatus of a host adapter and the method steps of controlling the detection of a final packet for generating a complete queue process was held to be ambiguous.

### ***Claim Objections***

3. Claims 2-9 are objected because they depend on a rejected claim 1.
4. Claims 11-18 are objected because they depend on a rejected claim 10.
